Monochrome This feature lets you create black and white images. In addition, you can use this tool to create a grayscale copy of an image or reduce the white areas to black.

Paint Bucket Tool The Paint Bucket tool can be used to paint a specific color over an image. The Paint Bucket works by either clicking within the image and painting, or by clicking a color on the color palette.

Text tool The Text tool is used to create text effects. You can create short sentences with the tool, and you can even apply text effects such as frames, drop shadows, and other text-based effects.

Filter Filters are powerful tools, in which you can create or modify color and brightness. They can also help you simulate certain effects such as embossing, which changes the appearance of a photo.

Raster or Non-Raster These two types of filters work in different ways. A raster filter works by “anticipating” where the filter should apply its effects, like by creating a black and white or black and white-ish filter. A non-raster filter, on the other hand, creates a new layer in which you move the filter’s edge as you apply it.

How to Use a Filter

1. Select the filter you want to use You can open the filter’s dialog box by pressing the Alt/Option key and then clicking on the Filters icon. To access the filter’s dialog box, press the Alt/Option key and click on the filter icon (the small green box). From this dialog box, you can access and apply the filter.
2. Select the effect you want to use This option will open a new window where you can select one or multiple filters, which will be applied to the current image. You can add or subtract filters by clicking the “Add” or “Subtract” buttons.
3. Click Apply After you’ve selected all the filters you want to use, click Apply and the filter should be applied to the current image. If you want to undo the filter and revert the image to its original state, click the “Undo” button. This button is located at the top-right corner of the dialog box. You can also click the

Is there a connection between dietary sugars, heart disease, and diabetes? There is some evidence that high-fructose corn syrup (HFCS) and sucrose found in foods and beverages like candy, soft drinks and desserts are as equally important as cholesterol in a heart attack. It’s also been suggested that high-fructose corn syrup may increase the risk of diabetes and heart disease. According to some experts, it’s time to start looking at sugar content in processed foods, beverages and pet foods. Check your labels, says the Centers for Disease Control and Prevention (CDC).
